My name is Muram Yaser Basher.
MY
Software Engineering Student | React Native & Django
Open to internship
About me
I am a Software Engineering student at INES-Ruhengeri who enjoys building practical software solutions to real-world problems. I have worked on mobile applications, REST APIs, and AI-powered projects, including VisionBridge, an assistive technology concept developed with Team Limitless. I am eager to keep learning, collaborate with other developers, and contribute to meaningful software projects.

About

Skills

React Native & Expo Intermediate
Building mobile app interfaces, navigation, and integrating backend APIs.

Python & Django REST Framework Intermediate
Developing backend APIs, handling requests, and working with authentication.

JavaScript & React Intermediate
Building interactive web interfaces and connecting frontend components to APIs.

Git & GitHub Intermediate
Managing repositories, branches, commits, and collaborating on projects.

AI & Computer Vision Integration Beginner
Exploring object detection, OCR, and AI-powered features for VisionBridge.

Education and training

2024 - present
BSc in Software Engineering
INES-Ruhengeri, Rwanda

Data use
This app stores only fictional or low-risk class data (your headline, biography, skill, availability and a local photo reference) on this device using AsyncStorage. No passwords or tokens are stored, and nothing is sent to a server. The portfolio works fully offline; only opening an optional project link needs internet.
